### Education

### Indian Institute of Information Technology Vadodara (IIITV)

B. Tech in Computer Science

2022 - 2026

# Experience

### ManMa Digital | Web Developer Intern

Feb 2025 - Present

- Working on full-stack development for ManMa Digital's website using React.js, Node.js, Express.js, and MySQL.
- Developing responsive, interactive UI with React.js and styling with Tailwind CSS.
- Building backend services with Node.js and Express.js, and integrating with a MySQL database.
- Implementing Next.js for better SEO and performance through server-side rendering.
- Contributing to both frontend and backend features to enhance user experience and functionality.

# **Projects**

### Railway Management System

- Designed a CRUD-based system for managing railway data using React.js (frontend), MySQL (backend), and Node.js (server-side).
- Features: User-friendly data management, search filters, and seamless CRUD operations for managing trains, stations, and schedules.
- Utilized Node.js to handle server-side logic, API requests, and database interactions.

#### **Image Explorer**

- Developed an image search application using React.js, HTML, CSS, and JavaScript.
- Integrated Pixabay API to fetch and display images based on user queries.
- Features: Category-based search, responsive design, and a user-friendly interface.

### Listenup (Music Player)

- Developed a music player using HTML, CSS, JavaScript, and Firebase for user data storage.
- Integrated an API to fetch song data and enable search, play, pause, and playlist management.
- Implemented real-time updates for dynamic song details and playlists.

## Technical Skills

Languages: HTML, CSS, JavaScript, Python, Java, C

Frameworks & Libraries: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Express.js, Node.js

Tools & Platforms: Git, GitHub, Postman, Figma, Excel

Databases: MongoDB, MySQL

Core Concepts: Full-Stack Web Development, Data Structures and Algorithms
